

## HFM-1080SR Automatic Laminating Machine with Hot knife

### Features:

1. Less temperature difference, high-speed operation, saving electric energy, and faster speed on the premise of ensuring the coating quality.
2. The water-based glue can be solidified quickly to achieve the purpose of high-speed film covering.
3. The roller surface is chrome plated and polished, with long service life and easy cleaning.
4. Equipped with pre-stacking mechanism to save downtime.
5. The front gauge and pull gauge ensure the straightness of paper feeding and film covering accuracy.
6. Servo motor control lap joint, centralized control of display screen for easy operation
7. Lamination unit fully cast body
